

Glaslux

- The Ultimate Window

Ordinary wooden window on the inside

Multiplied colour choices for the glass and all colours and clear lacquer on the inside

Frame and sash are not visible on the outside, covered with glass

Combination units

This window combines a unique design with 100% maintenance free exterior and high technical values. The window fulfils the 6 most important requirements for a window.

1. Maintenance Free

The window is made with glass on the outside, which overlaps the frame and sash. Why do we use glass when aluminium and plastic is available?

Glass has the advantage of being:

- 100 % maintenance free

2. Durability

Glass is indestructible. The colour on the bag of the glass is:

- Never fading
- Nondegradable
- 6 mm toughened glass on the outside

3. Security

The window is Secured by Design and equipped with

- Hardware in stainless steel
- Safety espagnolette and striking plate
- 6 mm toughened glass on the outside

4. Sound Insulation

The window has an extreme high sound insulation up to DB 37 as standard, as it is made with:

- 2 weather seals
- Triple glass

5. Thermal Insulation

Triple glazed, glass values:

- Ug-values 0,9 as standard
- Possible with Ug-values down to 0,5

6. Wind and Water Tightness

The rebated design makes the window extremely wind and water tight makes it possible to fit

- 2 weather seals
